

Secret No. 09/914,431
Art Unit: 1616

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the specification:

The paragraph beginning on line 28, page 17, entitled "Components (I) and (II)" and ending on line 2, page 18 which originally read as follows:

[Components (I) and (II)]

It has proved to be of advantage to select the constituents of components (I) and (II) so that a viscosity of 500 to 50,000 mPas at 25°C and preferably in the range from 2000 to 20,000 mPas, as measured to DIN, is reached.]

has been replaced with the following new text

--Components (I) and (II)

It has proved to be of advantage to select the constituents of components (I) and (II) so that a viscosity of 500 to 50,000 mPas at 25°C and preferably in the range from 2000 to 20,000 mPas, as measured to DIN 53211.--
